Date-of-Death Appraisals

Statewide California · Certified desktop appraisals, ordered entirely online

FOR CPAS, ESTATE ATTORNEYS, TRUSTEES & FIDUCIARIES

When a client inherits California real estate, the stepped-up basis under **IRC §1014** is only as defensible as the documentation behind it. We provide USPAP-compliant retrospective appraisals that establish fair market value as of the date of death — the figure your client will rely on when the property is eventually sold, and the one that must hold up if the IRS asks.

WHY YOUR CLIENT NEEDS ONE

- Establishes the stepped-up basis and eliminates capital gains tax on a lifetime of appreciation
- Supports the basis claimed on the return when a Form 1099-S reports the eventual sale
- Documents value for trust accounting, estate settlement, and distribution among beneficiaries
- Protects against IRC §6662 accuracy-related penalties if the basis is challenged
- Zestimates, AVMs, and broker price opinions do not meet the qualified-appraisal standard

SCOPE OF SERVICE

- **Property types:** Single-family residences and condominiums, including PUDs
- **Purposes:** Date of death / step-up in basis, trust valuations, gift tax
- **Coverage:** All 58 California counties
- **Effective dates:** Retrospective to any date — recent or decades past
- **Not covered:** Commercial, 2–4 unit income property, apartment buildings

FLAT-RATE PRICING — SAME PRICE ANYWHERE IN CALIFORNIA

Standard Desktop RECOMMENDED FOR CPA FILES

$449

- Location and neighborhood maps
- Comparable sale photographs
- Market conditions analysis
- Self-contained — reviewable without outside research

Basic Desktop

$299

- Identical analytical methodology
- Same certified value conclusion
- Streamlined report format
- Suited to simpler estates

Both tiers are USPAP-compliant and certified. The difference is the depth of presentation, not the quality of the analysis — the complete analysis is retained in the workfile and available if the appraisal is examined. No travel fees, no site-visit charges, no quote requests.
